

Botanical Decon30 Disinfectant: Efficacy By Organism Class

All disinfectants need to be registered by the EPA to make public germ-killing claims. They all must submit successful data showing kills over 99.99% against specific organisms within a standard contact time of 10 minutes. The EPA identifies particular organisms as representatives of their entire class of organism to optimize the testing process & avoid having to test every single organism within a class.

ORGANISM (CLASS)	REDUCTION	CONTACT TIME	CLAIM (CATEGORY)
Norovirus (Non-enveloped Virus)	99.999+%	10 Minutes	Virucidal (against Noro)
